

Lockheed Martin Space Systems Company

Lockheed Martin will feature GOES-R—the nation’s next-generation geostationary weather system. The Geostationary Operational Environmental Satellite-R Series (GOES-R) will include improved spacecraft and instrument technologies, leading to significant economic benefits in the areas of weather and water, climate, ecosystems monitoring and management, and commerce and transportation.

Expanding our knowledge and understanding of the universe is a challenging endeavor that Lockheed Martin has been actively engaged in for more than five decades. We have developed and deployed numerous spacecraft and products supporting our understanding of Earth and Planetary Science, Heliophysics, and Astrophysics. We’re accountable to one standard—100 percent Mission Success. We understand the risks and will not shy away from the hard challenges associated with this mission.
