

NOAA Direct Readout Registration Database

NOAA is frequently asked the question "Who uses your satellites and how do they use them?" The answer to that question is used to justify budgets and other resource allocations. Because of the anonymous nature of direct readout from satellites, in the past it has been difficult to answer. In order to get to know our users, to be able to demonstrate the need for NOAA's satellite systems, we are beginning an effort to voluntarily register users of NOAA's satellite data and services. With that information we can answer that often asked question, as well as keep you up to date with changes and anomalies in NOAA's satellite systems. Please visit us in the Patuxent Room, see a demo of the registration page, and allow a NOAA representative to help you register!
