

ERT, Inc.

Earth Resources Technology, Inc. (ERT) is a woman-owned small business that strives to provide its clients with innovative solutions to their science, engineering, environmental, and information technology challenges. Headquartered in Laurel, Maryland, ERT boasts a nationwide presence and a proud twenty year history.

In the nine years that ERT has been supporting NOAA, the agency has become one of our primary customers. We've been awarded over 40 contracts and 400 task orders to date, and our efforts span all five NOAA line offices (NESDIS, NMFS, NOS, NWS, and OAR).

We have strong experience with multiple NOAA satellites and their on-board instruments, as well as remote sensing algorithms, instrument calibration/validation, modeling and data assimilation, satellite ground systems development, IT security, science data analysis, mission IT support for science data centers, and systems/software engineering support.

For additional information, visit the company website at www.ertcorp.com.
